Subject: City of Modesto Contact for supply well information

Dak,

Melissa Duran with the City of Modesto can provide the most current analytical information for the City's Supply wells. Melissa can be reached at (209) 342-4596. Melissa's email address is: mduran@modesto.gov I understand from Melissa that City Well #1 (CW-1) is 224 feet deep, CW-6 is 234 feet deep and CW-7 is 260 deep. PCE has been detected in water from CW-1 but at a concentration that is currently below the MCL. PCE was detected at a concentration of 3.5 ppb in water from CW-1 during July 2016 and at a concentration of 2.3 during the October 2016 sampling event. A GAC system is currently being installed at CW-1. PCE was not detected in CW6 and CW7 during the October sampling event.

Jim
